Graphics for Digital Media

Personal Projects

Reviving Houston UXPA in Figma

- Collaborated with a team to create a website. Pages created were Home, Events, About, Partnerships, Contact, and Speakers.
- Developed wireframes to outline the overall structure and layout.
- Designed high-fidelity prototypes in Figma for the Home and Events pages.

Steam Redesign in Figma

- Collaborated with a team and redesigned multiple Steam pages. The pages were Home, User Profile, Browsing, News, Library, and Game.
- Fixed multiple pain points that surveyed users expressed about the current Steam web design.

Point: Bridge in Unreal Engine 5

- A first-person shooter video game in which the player needs to rescue a friendly NPC who will help the player clear the path towards the objective.
- Game logic and level design were developed by me. The environment uses premade assets.

Pirate Dreams in Unreal Engine 5

- A top-down shooter video game in which the player needs to reach a location while fighting enemies.
- Game logic and level design were developed by me. The environment uses premade assets.
